PROJECT

03/2026 – 05/2026	Responsive Personal Portfolio Website Personal Project - Designed and developed a fully responsive personal portfolio website from scratch to showcase technical projects and skills. - Built the website layout using modern CSS techniques, effectively implementing Flexbox and CSS Grid to ensure clean alignment and structure. - Optimized the user experience across various devices and screen sizes, ensuring pixel-perfect responsiveness using CSS Media Queries.
04/2025 – 05/2025	Library Management System Database Faculty of Computer Science, EELU - Designed and implemented a relational database schema for a Library Management System to efficiently track patrons, book inventory, and loan records. - Wrote and executed optimized SQL queries and scripts to test data integrity, constraints, and system functionality under different scenarios.
04/2025 – 05/2025	Metro Ticket Booking System Faculty of Computer Science, EELU - Collaborated in a team project to design a comprehensive Metro Ticket Booking System as part of the Software Engineering curriculum. - Took ownership of designing the UML Class Diagram, meticulously mapping out entity relationships, attributes, and methods to structure the system's architecture.
